

It is an infringement on my freedom to tell me I cannot listen to local weather and traffic reports on X-M satellite radio! You cannot control the masses - in the 1940's, radio broadcasters tried to squash television. In the 1970's, AM broadcasters tried to put an end to FM stations. You never win but you never learn either! You cannot force broadcast radio on us any longer. As long as you put CRAP on it, and have piddling traffic and weather on YOUR schedule (which is NOT often, when WE need it), you will have to deal with competition from people who actually give us something we want to pay for. We should be allowed to listen to whatever we want - and will not give up our freedoms because the FCC is greedy.

Wendy
